Pressure vessels for filtration and water softening.

Vessels range is composed of a wide variety of models, which can be adapted to the majority of applications in the domestic, commercial and industrial sectors.

- 1) Pressure tanks are made of high performance composite material with fiber glass filament winding.
- 2) All pressure tanks are made by a completely seamless molding technology.
- 3) All thread inlet made from 30% glass filled PP that provides improved strength, temperature and pressure limits.
- 4) HDPE Liner wall thickness available from 3.0 mm to 8.0 mm corresponding to the tank diameter.
- 5) Water contact parts are made by Food-Grade materials.
- 6) All pressure tanks are 100% rustproof and corrosion resistant.
